Subject: Tuesday meeting on Hunters Point

Draft writeup of meeting action item

Region 9 will be reaching out to Brigid to see if she agrees with the staff interpretation from Stuart that HQ would generally not support using a non EPA model such as RESRAD Build when the recommended EPA model such as the BPRG calculator indicates that model runs by RESRAD Build did not meet the risk range. The exception would be if there were technical reasons provided that allowed HQ to make a determination that the non EPA model (e.g., RESRAD Build) was technically superior for making Superfund RME risk assessments for the particular site situation being assessed.
